

Production Supervisor

Dynapower Corporation is seeking an experienced, highly motivated, detail oriented, organized, Production Supervisor with a high degree of personal initiative to join our production team. The qualified candidate will be responsible for but not limited to: directing a skilled team of Power Electronics Test Technicians, Electronics Test Technicians and Circuit Board Assemblers. The two Test Departments activities range from board level electronics and subassemblies, to complete power conversion systems. Lean Manufacturing, 5S and Quality program experience are required. The position will promote teamwork and safety as primary objectives. The successful candidate will have strong interpersonal, communication and problem solving skills, 5-10 years work experience in a manufacturing organization and 2+ years experience of successful leadership in a production environment. Effective group facilitation skills and the ability to work in a team environment a must.

Electronic Technician

Dynapower seeks motivated individual to join our Electronics Manufacturing and Development Department.

This individual will be tasked with the inspection, test and repair to the component level SCR and IGBT power supply products and printed circuit cards. This includes established designs and new products.

The responsible individual will perform tests for which procedures have been developed and create procedures for new product. Collect information concerning history, operational failures and modifications of products, compile reports, modify test equipment and test procedures.

Two (2) year technical degree with, a minimum 3 years experience in analog/digital electronics, circuit diagnostics and troubleshooting. Must be able to read and interpret engineering prints and parts list, various measuring instruments, read electronic and electrical diagrams. Familiarity with 3 phase and/or IGBT based power supplies a plus.
